	Read	Write	Speak
Gujarati	Excellent	Excellent	Excellent
English	Excellent	Very Good	Good
Hindi	Excellent	Excellent	Very Good

1 BAPS. Junagadh

- This is temple project based on PHP, HTML and CSS.
- The functionality of project is room-booking and give feedback.
- Room booking is manual process if user have Saint's spend otherwise room will not allocated.
- I learn how to handle feedback and how to replay it using PHP coding,

3 Fire Detect System

- This is project based on IOT(internet of things) .
- Our Professor Ketan Sir taught us about following sensors & tools:
 - * ESP32
 - * Gas sensor
 - * Flame sensor
 - * Servo motor
 - * DHT 11
 - * PIR Sensor
 - * Ultrasonic Sensor
- I personally learnt Blynk, Arduino , Thingspeak.
- There are three members in our group ,they both created the model of system and i wrote the code.
- Basically in project the flame sensor and Gas sensor detect the fire and the badger will ringing. Last faze the sprinkle melt the fire and send message to user.

5 LJ Alumni System

- This Project based on PHP , HTML , CSS & JavaScript which entire handled by me.
- First the user register their details. then after admin verified their the details.
- She/He will chat with the other alumni.
- I learn from this project that how to handle client side and server side alumni project.

2 Simple Quiz App

- It is based on flutter. it's basic quiz application for 10 marks.
- User fill the test then after He/She will Display the marks ,the negative system is additional function.
- Our Team Size is 3 member , I was designing it and two others makes functionality of quiz marks counting.
- I learnt basic concept of quiz system and design in flutter.

4 The Shelter

- This is project based on communication skill. We are 7 persons in group , I was the coordinate the entire team.
- Our team visited The shelter where live some joint family. I was visited many time that place. A boy of which name is "Joseph" is the One of the brilliant and proactive child. He is the dignity of entire family. He is 12 years old and he has 8 siblings. When i met him first time ,I could not able to give answer for his question. He asked me "Brother what beautiful shoes you wear ".it says his pain that I have not champal. Then I was not control myself for crying. For that incident I was inspired and I think about that I will help you and the time is come and I catch the opportunity and a part of Communication Skill Project I visited him shelter and here i describe some statistics, analysis, image and information which described the reality of our Humanity and Society.
- These people live here in extreme poverty. there is no abode ,they finds abode wherever they goes and makes a living, even though the conditions are very bad , these people take care of their children very well and send their children to schooling for education.it is the belief of those people that we live in poverty but our children have a good life. they don't choose their life and they also have a lot of problems with water. water is applied to them by walking a kilometer but despite these difficulties.

6 keyurvadhiya.in

- This Project based on PHP , HTML , CSS & JavaScript and hosting that entire system handled by me.
- The template was taken from Free-css.com website and hosting manage by me which guided by my mentor kalpesh sir.
